61			62			63				64			
65						66				67			
68						69				70			

Helpful hints: Every puzzle has at least a couple easy answers. Answer those first and use them to confirm other answers. A clue is always the same part of speech as the answer. If a clue has an abbreviation, it's likely the answer does too. If the clue uses slang, the answer likely does too. If the clue is followed by an question mark, it probably a play on words.
